Education

INDIAN INSTITUTE OF INFORMATION TECHNOLOGY DHARWAD 2023 – 27

B.Tech in Computer Science and Engineering

GPA: 7.44

Minor in Cyber Security

GPA: 8.29

Experience

Open Source contributor – Noveum Orbit

Aug 2026 – Present

- Contributed production-ready features and fixes to **Orbit**, an open-source collaborative workspace platform, working across its **TypeScript/Bun monorepo**.
- Diagnosed and resolved repository issues involving **development workflows, documentation, CI/CD, and project tooling**, with contributions reviewed and merged by maintainers.
- Collaborated through **GitHub pull requests, code reviews, and issue-driven development**, following established engineering practices for testing, linting, and maintainable code.

Projects

Container Security ↗

AWS, MLflow, Trivy

- An advanced, end-to-end container vulnerability scanning and anomaly detection system based on machine learning.
- Built a CI-integrated container security pipeline using Trivy for vulnerability scanning and Isolation Forest for anomaly detection on image metadata and vulnerability patterns.
- Currently working on optimizing the accuracy of vulnerability identification.

Indian Market Risk Engine for retailers ↗

Python, ML, finance

- Integrated dynamic fundamental indicators into the risk model to adjust risk scores based on macro and valuation context.
- Modeled market risk using volatility, drawdowns, VaR/CVaR, and fundamentals on Indian equity data, generating dynamic risk scores for portfolio decision support

Dream Home ↗

express.js, mysql, restfull apis, HTML, CSS, JavaScript

- Developed a complete property rental management system supporting client registration, property listing, viewing scheduling, lease agreement generation, and weekly reporting.
- Implemented secure user authentication and role-based authorization using JWT and bcrypt, with three distinct roles (Admin, Staff, Client) to control access to sensitive operations.

Achievements

- Solved 400+ algorithmic problems across LeetCode and coding platforms.
- Built 10+ end-to-end software projects across networking, security, ML and web development.
- Selected for Minor Specialization in Cyber Security.
- Active participant in hackathons and technical competitions.

Technical Skills

Languages: C, C++, Python, Java, SQL, JavaScript, CUDA

Frameworks: Flask, Tkinter, React, Express

Tools: Git, MySQL, Docker, Jenkins

Domains: Machine Learning, Computer Vision, Databases
